DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 2-5, drawn to a processing apparatus with positioning means, classified in class 83, subclass 76.8.
 - II. Claim 1 and 6, drawn to a processing apparatus with a specific holder configuration, classified in class 83, subclass 451.
2. Claims 1-6 have been restricted such that the patentability of the invention is presumed to lie in the details of the particular group (e.g. the positioning means of Group I). It is noted that if claim 1 as originally filed is part of an elected group and determined to be patentable, rejoinder of claims 1-6 will be considered. It is further noted that claim 1 is listed as part of groups I and II but is not considered to be part either of these groups. Rather, claim 1 recites subject matter that is common to both groups and has been shown as part of each group for clarity (i.e., so that it is clear which claims are part of which group). Further, because claim 1 includes subject matter that is common to both groups, it is not considered to be independent or distinct from either of the groups. Therefore, claim 1 will be examined upon election of one of the groups.
3. The inventions are distinct, each from the other because of the following reasons:
4. Inventions of group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

shown to be separately usable. In the instant case, the positioning means of group I could be employed without the specific holder configuration of group II; and conversely, the specific holder configuration of group II could be employed without the positioning means of group I. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
